

LOW PRESSURE COPPER WARRANTY

Due to localised water conditions, Rheem New Zealand advise that any of our “Peter Cocks” branded Low Pressure Copper hot water cylinders are not suitable for installation in the postcode areas of 4120 and 4122 in the Hastings district. We confirm that these cylinders are outside of our Rheem Warranty water chemistry terms based upon recent testing and may result in subsequent pinhole corrosion. Despite not being covered under the Rheem warranty policy, on occasion, Rheem has voluntarily chosen to replace affected cylinders. This practice will cease for cylinders installed in the affected areas after 1 April 2022.

We would therefore recommend our Rheem vitreous enamel or alternately Rheem or Peter Cocks stainless steel cylinders for installation in these areas assuming localised conditions remain as per the recent water testing. Should you have any questions, please feel free to contact Customer Services on 0800 657 336.
